

notes from the field

Location: *Sierra de la Ventana, Argentina*

Product Sourced: *Organic Sage*

The Story: *Our Organic sage is grown in Sierra de la Ventana, a picturesque village in the extremely fertile Humid Pampas region of Buenos Aires. The 6,000 hectare organic family farm produces a variety of crops with 110 hectares in the center reserved for herb production. The spring time is especially majestic here, where you can stand in the middle of a sage field and breath in the sweet pungent aroma of pure *Salvia officinales* in full bloom.*
