

notes from the field

Location: *Denizli, Turkey*

Product Sourced: *Organic Oregano*

The Story: *Our organic oregano is cultivated high on the mountaintops and ridge lines above Denizli. This elevated location protects them from contamination by drift and run-off. After two consecutive years with devastatingly short yields, this year produced an above average harvest offering a bit of welcome relief to the worldwide shortage of organic oregano. To that, we can all say a collective "Bon appetite".*
