

notes from the field

Location: *Southern Washington State*
Product Sourced: *Organic Goldenseal Root*

The Story: *In the heart of the southern Cascades we found a 55 acre certified organic family farm that sustainably cultivates goldenseal root. Grown on 1 acre, shaded plots blessed with rich volcanic soil, clean air and long, cool growing season, the goldenseal is hand-harvested and hand-washed 5 times to gently clean the delicate roots. This unique approach to processing embodies the reverence people have for this product.*
