## Why Choose Fair Trade Certified<sup>™</sup> Products?

By choosing Fair Trade products you are directly supporting a better life for farming families through fair prices, direct trade, community development, and environmental stewardship.

While the sugar industry has a much more hopeful future than past, even now, in too many places, it's a grim business. Rooted in factory farms that put cane growers and the environment at the losing end of a long line of production processes, impoverished farmers in the developing world grow more than 20 percent of the sugar imported into the US today. They are subjected to unpredictable and often declining world market prices and dangerous working conditions. They live in crowded company camps where illness and violence are common. They live on land that is sprayed with pesticides, herbicides and defoliants, then it's burned. It is a cyclic poisoning of the soil, air, groundwater—and people. For many, there is just no escape. But for others, change has already come.

**NEW LEAF PAPER<sup>®</sup>**  
 ENVIRONMENTAL BENEFITS STATEMENT of using post-consumer waste fiber vs. virgin fiber  
 Aura Cacia saved the following resources by using New Leaf Primavera Gloss (FSC), made with 80% recycled fiber and 60% post-consumer waste, 80% processed chlorine free, and manufactured with electricity that is offset with Green-e<sup>®</sup> certified renewable energy certificates.

trees	water	energy	solid waste	greenhouse gases
4 fully grown	2,504 gallons	3 million Btu	201 pounds	523 pounds

Calculations based on research by Environmental Defense and other members of the Paper Task Force.
